NEW QUESTION: 2
Your company network has two branch offices. Some employees work remotely, including at public locations.
You manage an Azure environment that includes several virtual networks.
All users require access to the virtual networks.
In the table below, identify which secure cross-premise connectivity option is needed for each type of user.
Make only one selection in each column.

Answer:
Explanation:

Explanation

* A site-to-site VPN allows you to create a secure connection between your on-premises site and your virtual network.
* A point-to-site VPN also allows you to create a secure connection to your virtual network. In a point-to-site configuration, the connection is configured individually on each client computer that you want to connect to the virtual network.
* Use a point-to-site configuration when:
You want connect to your virtual network from a remote location. For example, connecting from a coffee shop.

You have a site-to-site connection, but have some clients that
need to connect from a remote location.
