System Image in Windows 7

The new backup utilities in Windows 7 are actually pretty impressive and creating an image will be possible in all versions. Today we take a look at creating a backup image of your machine without the need for a third party utility like Ghost or True Image.

You are just finished installing a fresh copy of Windows 7 on your computer and have it set up to your liking. One of the first things you should do now is create an image of the disc so in the event of a crash you will be able to restore it to its current state. An image is an exact copy of everything on the drive and will restore it back to its current state. It's probably best to create an image when everything is clean and organized on your system. This will make the image file smaller and allows you to restore the system with a smooth running set up.
