NEW QUESTION: 1

DRAG DROP

You are developing an ASP.NET Software-as-a-Service (SaaS) application that stores database credentials in Azure Key Vault.

When the application encounters an error, information about the error is shown to the end user for support purposes.

Information shown includes:

-stack trace
-application version and release date
-configuration values

Database credentials must not be accessible to end users.
You need to ensure that end users cannot view database credentials.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

NEW QUESTION: 2

Answer: B,C,D

NEW QUESTION: 3

Select the correct set of options. These are the initial settings for the default security group:

- A.** Allow no inbound traffic, Allow all outbound traffic and Does NOT allow instances associated with this security group to talk to each other
- B.** Allow no inbound traffic, Allow all outbound traffic and Allow instances associated with this security group to talk to each other
- C.** Allow all inbound traffic, Allow no outbound traffic and Allow instances associated with this security group to talk to each other
- D.** Allow all inbound traffic, Allow all outbound traffic and Does NOT allow instances associated with this security group to talk to each other

Answer: B

Explanation:

Explanation

<http://docs.aws.amazon.com/AWSEC2/latest/UserGuide/using-network-security.html#default-security-group> A default security group is named default, and it has an ID assigned by AWS. The following are the initial settings for each default security

group:

Allow inbound traffic only from other instances associated with the default security group Allow all outbound traffic from the instance The default security group specifies itself as a source security group in its inbound rules. This is what allows instances associated with the default security group to communicate with other instances associated with the default security group.
