E. Snowball appliance with a 100 Mbps connection and a dedicated network connection and a dedicated network connection

F. Snowball appliance with a 100 Mbps connection and a dedicated network connection and a dedicated network connection and a dedicated network connection

**Answer: A**

Explanation:

Even with high-speed Internet connections, it can take months to transfer large amounts of data.

For example, 100 terabytes of data will take more than 100 days to transfer over a dedicated 100 Mbps connection. That same transfer can be accomplished in less than one day, plus shipping time, using two Snowball appliances.
