Our CGEIT dumps take the leading position in this area.

NEW QUESTION: 1

What are the two FEX connection modes? (Choose two.)

- A. Clan pinning mode
- B. Soft-pinning mode

- C. Port channel mode
- D. Hard-pinning mode
- E. Physical-pinning mode

Answer: C,D

NEW QUESTION: 2

Which two SCCP call signaling messages are initiated by Cisco Unified Communications Manager to an IP phone? (Choose two.)

- A. KeypadButton
- B. CallState
- C. CloseReceiveChannelAck
- D. OpenReceiveChannel
- E. SoftKeyEvent
- F. Offhook

Answer: B,D

Explanation:

Upon receiving an OpenReceiveChannel message, the IP phone selects the UDP port number it wants to use to receive RTP packets and reports this information to call manager. With the SCCP protocol architecture, the majority of the H.323 processing power resides in an H.323 proxy -- the Cisco CallManager. The end stations (IP phones) run the Skinny client, which consumes less processing overhead. The client communicates with CallManager using connection-oriented (TCP/IP-based) communication to establish a call with another H.323-compliant end station. Once Cisco CallManager has established the call, the two H.323 end stations use connectionless (UDP/IP-based) communication for audio transmissions.

NEW QUESTION: 3

You are an EMC service provider and want to install the ESRS IP client solution. The workstation on which you want to install this software is on a network with a proxy server.

What information must be provided to install the solution?

- A. Powerlink SecurID credentials and the proxy configuration
- B. Array serial number and the proxy configuration
- C. Proxy server IP address and the array IP address
- D. Windows administrative credentials and the proxy configuration

Answer: A
