NEW QUESTION: 1
A security administrator implements access controls based on
the security classification of the data and need-to-know
information. Which of the following BEST describes this level
of access control?
A. Least privilege
B. Implicit deny

C. Role-based Access Control
D. Mandatory Access Controls
Answer: D
Explanation:
Mandatory Access Control allows access to be granted or
restricted based on the rules of classification. MAC also
includes the use of need to know. Need to know is a security
restriction where some objects are restricted unless the
subject has a need to know them.
