C. cryptographic key exchange
D. endpoint security
Answer: D

NEW QUESTION: 2

A. Option A
B. Option C
C. Option D
D. Option B
Answer: A,C,D

NEW QUESTION: 3
Click on the exhibit below.

Assume PE-1 has a mesh-sdp configured to every PE node in both
Metro networks. What could be done
to prevent the bandwidth replication between Metro 1 and Metro
2?
A. PE-1 can be configured with spoke-SDPs to every PE node in
both Metro networks. This will reduce
the bandwidth and replication within the network.
B. PE nodes in Metro 1 could be configured with mesh-SDPs. PE
nodes in Metro 2 would be configured
with mesh-SDPs. However, the connection between Metro networks
(PE-2 to PE-6) can be configured
with a spoke-sdp. This would reduce the replication and
bandwidth used on the link between Metro
networks. This also reduces the replication required by PE-1.
C. PE nodes in Metro 1 could be configured with spoke-SDPs. PE
nodes in Metro 2 would be configured
with spoke-SDPs. However, the connection between Metro networks
(PE-2 to PE-6) can be configured
with a mesh-sdp. This would reduce the replication and
bandwidth used on the link between Metro
networks. This also reduces the replication required by PE-1.
D. PE-1 must be configured with mesh-SDPs to every node
receiving the multicast traffic. There is no way
to reduce the replication or bandwidth.
Answer: B

NEW QUESTION: 4
You are reconciling your subledger balances and you need a report that includes beginning and ending account balances and all transactions that constitute the account's activities. What type of report will provide this type of information?
A. Aging Reports
B. An Online Transactional Business Intelligence (OTBI) report to create ad hoc queries on transactions and balances
C. Journals Reports
D. Account Analysis Reports
Answer: D
