NEW QUESTION: 1
With AWS CloudTrail, creating multiple trails in one region allows _____ to focus on one aspect of AWS operation.
A. stakeholders
B. callers
C. buckets
D. events
Answer: A
Explanation:
With multiple trails, different stakeholders such as security administrators, software developers, and IT auditors can create and manage their own trails. For example, a security administrator can create a trail that applies to all regions and configure encryption using one Key Management Service key. A developer can create a trail that applies to one region for troubleshooting operational issues.
