Answer: B,C

NEW QUESTION: 2

A. Option B
B. Option A
Answer: A

NEW QUESTION: 3
You have a computer that runs windows 7.
The network contains a monitoring server named server1 Computer
runs a monitoring service named service1.
Service 1 uses remote procedure. You need to ensure that
service1 can receive requests from server1.
What should you do?
A. From windows Firewall with Advanced Security, create custom
rule.
B. From the Network and Sharing Center, modify the network
location settings.
C. From windows Firewall with Advanced Security, create a
predefined rule.
D. From the Network and Sharing Center, modify the advanced
sharing settings.
Answer: A
Explanation:
Creating WFAS Rules The process for configuring inbound rules
and outbound rules is essentially the same: In the WFAS
console, select the node that represents the type of rule that
you want to create and then click New Rule. This opens the New
Inbound (or Outbound) Rule Wizard. The first page, allows you
to specify the type of rule that you are going to create. You
can select between a program, port, predefined, or custom rule.
The program and predefined rules are similar to what you can
create using Windows Firewall. A custom rule allows you to
configure a rule based on criteria not covered by any of the
other options. You would create a custom rule if you wanted a
rule that applied to a particular service rather than a program
or port. You can also use a custom rule if you want to create a

rule that involves both a specific program and a set of ports. For example, if you wanted to allow communication to a specific program on a certain port but not other ports, you would create a custom rule.

NEW QUESTION: 4
Which five functions can a user with the single role of Hub Administrator access?
A. deactivating a deployed project
B. changing their own password
C. disabling another user's account
D. downloading Oracle Policy Modeling
E. changing web service API access
F. creating a web service connection
G. adding a project to a repository
H. deploying a project snapshot
Answer: A,B,C,E,H
