- A. False
- B. True

**Answer: B**

#### **NEW QUESTION: 3**

- A. ntp server 10.1.1.1  
ntp server 10.1.1.2 prefer
- B. ntp server 10.1.1.1  
ntp server 10.1.1.2
- C. ntp server 10.1.1.1 fallback

```
ntp server 10.1.1.2
D. ntp server 10.1.1.1
ntp server 10.1.1.2 primary
```

**Answer: A**

Explanation:

Explanation

Preferred server

A router can be configured to prefer an NTP source over another. A preferred server's responses are discarded only if they vary dramatically from the other time sources. Otherwise, the preferred server is used for synchronization without consideration of the other time sources. Preferred servers are usually specified when they are known to be extremely accurate. To specify a preferred server, use the prefer keyword appended to the ntp server command. The following example tells the router to prefer TimeServerOne over TimeServerTwo

:

```
Router#config terminal
```

```
Enter configuration commands, one per line. End with CNTL/Z.
```

```
Router(config)#ntp server TimeServerOne prefer
```

```
Router(config)#ntp server TimeServerTwo
```

```
Router(config)#
```
