**NEW QUESTION: 1**

You are the project manager of the SWC project. You have created the stakeholder register. In the stakeholder register of your project, you will have all of the following information except for which one?

- A. Identification information
- B. Stakeholder classification
- C. Assessment information
- D. Project management team's classification

**Answer: D**

Explanation:

The stakeholder register does not contain the project management team's classification information. The stakeholder register is a project management document that contains a list of the stakeholders associated with the project. It assesses how they are involved in the project and identifies what role they play in the organization. The information in this document can be very perceptive and is meant for limited exchange only.

It also contains relevant information about the stakeholders, such as their requirements, expectations, and influence on the project. Answer options D, C, and A are incorrect. These are the parts of the stakeholder register.

**NEW QUESTION: 2**

**NEW QUESTION: 3**

A user has setup an RDS DB with Oracle. The user wants to get notifications when someone modifies the security group of that DB. How can the user configure that?

- A. Configure the CloudWatch alarm on the DB for a change in the security group
- B. It is not possible to get the notifications on a change in the security group
- C. Configure SNS to monitor security group changes
- D. Configure event notification on the DB security group

**Answer: D**

Explanation:

Explanation

Amazon RDS uses the Amazon Simple Notification Service to provide a notification when an Amazon RDS event occurs. These events can be configured for source categories, such as DB instance, DB security group, DB snapshot and DB parameter group. If the user is subscribed to a Configuration Change category for a DB security group, he will be notified when the DB security group is changed.
