NEW QUESTION: 1

You track all costs on your project. You need to track task-level airfare costs that do not depend on the amount of work or duration of a task. What should you do?

A. Use a budget resource.

B. Create a custom field and capture travel costs at the project level.

- C. Use a work type resource.
- D. Use a cost type resource.

Answer: D

NEW QUESTION: 2

You are using a table named `tblSales` in a Microsoft SQL Server database. The table has a column named `ProductID` of type `int`. The table has a primary key on `ProductID`. You are running the following query:

```

SELECT ProductID, Sales
FROM tblSales
WHERE ProductID < 1000000
ORDER BY ProductID

```

The query returns the following error message:

```

Msg 8033, Level 16, State 1, Line 1
Conversion of varchar(512) data to int data type failed.

```

What should you do to resolve the error?

- A. Add a NOLOCK query hint to the SELECT statement.
- B. Add a FORCESEEK query hint to the SELECT statement.
- C. Change the `@FileName` parameter from `nvarchar(512)` to `varchar(512)`.
- D. Change the `FileName` column from `varchar(512)` to `nvarchar(512)`.
- E. Convert the table to a memory-optimized table.

Answer: C

Explanation:

When using a variable, make sure that the datatype matches the column's datatype. We suspect that the issue is that the variable is `NVARCHAR (512)` whilst the table column is `VARCHAR (512)`. This is indicated by the `CONVERT_IMPLICIT` operator in the execution plan.

NEW QUESTION: 3

You are using a Microsoft SQL Server database. The database has a table named `tblSales` with a column named `ProductID` of type `int`. The table has a primary key on `ProductID`. You are running the following query:

```

SELECT ProductID, Sales
FROM tblSales
WHERE ProductID < 1000000
ORDER BY ProductID

```

The query returns the following error message:

```

Msg 8033, Level 16, State 1, Line 1
Conversion of varchar(512) data to int data type failed.

```

What should you do to resolve the error?

- A. Vulnerability Protection profile
- B. Zone Protection profile
- C. Anti-Spyware profile
- D. URL Filtering profile

Answer: D

NEW QUESTION: 4

What is the current NAA type in the WWN format used within EMC

Data Domain OS 5.4?

- A. 0
- B. 1
- C. 2
