Answer: A,B,D
Explanation:
Explanation
References:

NEW QUESTION: 4
.What determines the strength of a secret key within a
symmetric key cryptosystem?
A. A combination of key length and the complexity of the
data-encryption algorithm that uses the key
B. Initial input vectors and the complexity of the
data-encryption algorithm that uses the key
C. A combination of key length, initial input vectors, and the
complexity of the data-encryption algorithm that uses the key
D. A combination of key length, degree of permutation, and the
complexity of the data-encryption algorithm that uses the key
Answer: C
Explanation:
The strength of a secret key within a symmetric key
cryptosystem is determined by a combination of key length,
initial input vectors, and the complexity of the
data-encryption algorithm that uses the key.
