your life and career by just a step with according Associate-Developer-Apache-Spark certification.

**NEW QUESTION: 1**

You work as a project manager for BlueWell Inc. You with your team are using a method or a (technical) process that conceives the risks even if all theoretically possible safety measures would be applied. One of your team member wants to know that what is a residual risk. What will you reply to your team member?

- A. It is a risk that can not be addressed by a risk response.
- B. It is a risk that will remain no matter what type of risk response is offered.
- C. It is a risk that remains after planned risk responses are taken.
- D. It is a risk that remains because no risk response is taken.

**Answer: C**

**NEW QUESTION: 2**

Your network contains an Active Directory domain named contoso.com. All domain controllers run Windows Server 2012 R2. The domain contains two domain controllers. The domain controllers are configured as shown in the following table.

You configure a user named User1 as a delegated administrator of DC10. You need to ensure that User1 can log on to DC10 if the network link between the Main site and the Branch site fails. What should you do?

- A. Add User1 to the Domain Admins group.
- B. On DC10, modify the User Rights Assignment in Local Policies.
- C. On DC10, run ntdsutil and configure the settings in the Roles context.
- D. Run repadmin and specify the /prp parameter.

**Answer: D**

Explanation:

Explanation

repadmin /prp will allow the password caching of the local administrator to the RODC.

This command lists and modifies the Password Replication Policy (PRP) for read-only domain controllers (RODCs).

Reference: RODC Administration
