So the one minute earlier you get the Databricks Certified Associate Developer for Apache Spark 3.0 Exam practice material pdf, the more opportunities come to you, We promise your success in the Databricks Associate-Developer-Apache-Spark exam at your first attempt with our 100% refund policy.

Getting latest exam questions you'll be able to pass your Databricks Associate-Developer-Apache-Spark exam in first attempt easily.

NEW QUESTION: 1

You must apply patches and patch bundles in a rolling fashion, if possible, on the components of your Database Machine.

You use RAC for your database and also use Data Guard, having standby database on another Database Machine.

You wish to have scripts that contain the appropriate command to patch your environment.

Your patch bundle is on the first database server and is located at /u01/stage.

You have downloaded the oplan utility to the first database server and run the following:

```
$ORACLE_HOME/oplan/oplangenerateApplySteps /u01/stage
```

Which two are true concerning oplan?

- A.** It will generate instructions for patching the Grid Infrastructure home on the primary location.
- B.** It will generate instructions for patching the RAC Oracle Home on the primary location.
- C.** It will generate instructions for patching the Data Guard environment on the standby location.
- D.** It will generate instructions for patching all the components on the Database Machine.
- E.** It will generate instructions for patching only storage servers.

Answer: A,B

Explanation:

Oplan generates instructions for all of the nodes in the cluster.

Note:

*Oplan is a utility that facilitates you with the application of bundle patches on Exadata compute nodes via Opatch. This new utility helps you with the patch process by generating step-by-step instructions telling you how to apply a bundle patch in your environment.

*Exadata is much more than a "database-in-a-box." It is a set of compute nodes (think RAC node servers) combined with ultra-fast infiniband (...and 10GB ethernet, and multiple 1GB ethernet) and storage nodes.

Incorrect:

Not D: There is no support for Oracle DataGuard

NEW QUESTION: 2

How does a DHCP reservation work?

- A.** By leasing a set of reserved IP addresses according to their category.
- B.** By assigning options to the computers on the network by priority

C. By letting the network switches assign IP addresses from a reserved pool

D. By matching a MAC address to an IP address within the DHCPscope

Answer: D

NEW QUESTION: 3

To run RSP which Steelhead appliance ports must to be connected to your network? (Select 2)

A. LAN

B. Auxiliary

C. Primary

D. Inpath0_0

E. WAN

Answer: B,C
