Which option describes the behavior of this configuration?

- A. Traffic from the n2 network object to the inside network will be translated using the n1 network object.
- B. Traffic from the n2 network object to the outside network will be translated using the n2 network object.
- C. Traffic from the n2 network object to the outside network will be translated using the n1 network object.
- D. Traffic from the n1 network object to the outside network will be translated using the n2 network object.

Answer: C

Explanation:

Explanation The command that need focus here is: Object network n2

Nat (inside,outside) dynamic n1

The highlighted command is sub command of the object network n2 i.e. This command is only applicable for n2. When you configure anything within an object network then it is significant only for that object. Here it is saying that 172.16.2.0/24 when they go outside, then they will be translated to ip address specified in the object group n1.
