NEW QUESTION: 1

You have maintained planning strategy group 10 (make-to-stock production) in the material master (SAP ECC) of a material. For the coming months, you have planned requirements with requirement type LSF (derived from main strategy 10). Now, you want to change the requirement type from LSF to VSF (in accordance with planning strategy 40, planning with final assembly) for requirements in the existing production plan. Which of the following scenarios are applicable in this case?

(Choose two)

- A. You must change the requirement type for planning strategy 10 to VSF in Customizing. The requirement type for all existing requirements is then changed by the next planning run.
- B. You can enter the strategy group 40 in the material master and change the present requirement for the product manually in the production plan.
- C. You can enter the strategy group 40 in the material master, but the requirement type is not changed automatically for existing requirements.
- D. You can change the strategy group from 10 to 40 for the existing production plan in the material master, and the requirement type for all requirements is changed automatically.

Answer: B,C
