Do you want to be different from the rest, In other words, you can prepare for your CTAL-TM_Syll2012DACH exam with under the guidance of our training materials anywhere at any time.

NEW QUESTION: 1

Which two characteristics of a link-state routing protocol are true? (Choose two)

A. Each router establishes an adjacency to every other router in the network

- B. Each router uses Dijkstra's algorithm to determine the shortest path.
- C. Each router uses LSAs to exchange the information about the network topology.
- D. Each router uses the same path to each network in the topology.
- E. Each router in the network maintains a separate routing database of its own neighbors.

Answer: B,C

NEW QUESTION: 2

- Which of the following is the BEST way to ensure that a network is resilient to a single point of failure?
- A. Implement a redundant power supply for all network devices.
 - B. Implement a redundant network topology.
 - C. Implement a redundant network administrator.
 - D. Implement a redundant network service.

Answer: B

NEW QUESTION: 3

A network engineer is attempting to design-in resiliency characteristics for an enterprise network's VPN services. If the engineer wants to help ensure some resilience against zero-day vulnerabilities exploited against the VPN implementation, which of the following decisions would BEST support this objective?

- A. Subscribe to a managed service provider capable of supporting the mitigation of advanced DDoS attacks on the enterprise's pool of VPN concentrators.
- B. Implement a reverse proxy for VPN traffic that is defended and monitored by the organization's SOC with near-real-time alerting to administrators.
- C. Employ a second VPN layer concurrently where the other layer's cryptographic implementation is sourced from a different vendor.
- D. Distribute the VPN concentrators across multiple systems at different physical sites to ensure some backup services are available in the event of primary site loss.

Answer: C
