NEW QUESTION: 1

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not

appear in the review screen.

You have an Azure virtual machine named VM1. VM1 was deployed by using a custom Azure Resource Manager template named ARM1.json.

You receive a notification that VM1 will be affected by maintenance. You need to move VM1 to a different host immediately.

Solution: Solution: From the Overview blade, you move the virtual machine to a different subscription.

Does this meet the goal?

A. Yes

B. No

Answer: B

NEW QUESTION: 2

SD-WAN WAN Edge routers are configured to connect to the SD-WAN fabric. The vSmart controller is configured to connect to the SD-WAN fabric. The vManage controller is configured to connect to the SD-WAN fabric. The vBond controller is configured to connect to the SD-WAN fabric.

A.

vEdge routers are configured to connect to the SD-WAN fabric. The vSmart controller is configured to connect to the SD-WAN fabric. The vManage controller is configured to connect to the SD-WAN fabric. The vBond controller is configured to connect to the SD-WAN fabric.

B.

vEdge routers are configured to connect to the SD-WAN fabric. The vSmart controller is configured to connect to the SD-WAN fabric. The vManage controller is configured to connect to the SD-WAN fabric. The vBond controller is configured to connect to the SD-WAN fabric.

C.

SD-WAN WAN Edge routers are configured to connect to the SD-WAN fabric. The vSmart controller is configured to connect to the SD-WAN fabric. The vManage controller is configured to connect to the SD-WAN fabric. The vBond controller is configured to connect to the SD-WAN fabric.

D. SD-WAN WAN Edge routers are configured to connect to the SD-WAN fabric. The vSmart controller is configured to connect to the SD-WAN fabric. The vManage controller is configured to connect to the SD-WAN fabric. The vBond controller is configured to connect to the SD-WAN fabric.

Answer: B

Explanation:

+ Orchestration plane (vBond) assists in securely onboarding the SD-WAN WAN Edge routers into the SD-WAN overlay (> Therefore answer "onboard vEdge nodes into the SD-WAN fabric" mentioned about vBond). The vBond controller, or orchestrator, authenticates and authorizes the SD-WAN components onto the network. The vBond orchestrator takes an added responsibility to distribute the list of vSmart and vManage controller information to the WAN Edge routers. vBond is the only device in SD-WAN that requires a public IP address as it is the first point of contact and authentication for all SD-WAN components to join the SD-WAN fabric. All other components need to know the vBond IP or DNS information.

+ Management plane (vManage) is responsible for central configuration and monitoring. The vManage controller is the centralized network management system that provides a single pane of glass GUI interface to easily deploy, configure, monitor and troubleshoot all Cisco SD-WAN components in the network. (> Answer "manage, maintain, and gather configuration and status for nodes within the SD-WAN fabric" and answer "gather telemetry data from vEdge routers" are about vManage)

+ Control plane (vSmart) builds and maintains the network

topology and make decisions on the traffic flows. The vSmart controller disseminates control plane information between WAN Edge devices, implements control plane policies and distributes data plane policies to network devices for enforcement (-> Answer "distribute security information for tunnel establishment between vEdge routers" is about vSmart)

NEW QUESTION: 3

Which HP technology enhances printer performance and minimizes network traffic?

- A. send once / RIP once
- B. RIP first/transmit later
- C. transmit once / RIP triple
- D. transmit once / RIP once

Answer: D
