NEW QUESTION: 2

Which password is used for VTY sessions if the enable password command is not configured and the console password is configured?

- A. adminadmin123
- B. testing 1234
- C. cisco123
- D. default

Answer: B

Explanation:

If neither the enable password command nor the enable secret command is configured, and if there is a line password configured for the console, the console line password serves as the enable password for all VTY sessions. The "enable secret" will be used first if available, then "enable password" and line password.
