NEW QUESTION: 1

A. Option E

B. Option A
C. Option D
D. Option B
E. Option C
Answer: E

NEW QUESTION: 2
Systems Development Lifecycle (SDLC) is used to manage risk
within the development of new computer systems.
Which THREE of the following are appropriate controls to manage
risk within the SDLC Process?
A. When the implementation of the new system is taking place,
parallel running must be undertaken to ensure the output for
the new system exactly matches that from the old system.
B. The Post Completion Review should take place immediately
after the implementation while all the facts are still fresh in
everyone's minds.
C. When planning the new system, a clear business case must be
approved specifying functionality, data transformation,
expected costs and benefits.
D. When developing the new system, the developers must follow
defined programming standards and carry out component test to
specified test harness outputs.
E. When designing the new system, controls must be put in place
to ensure that all the functionalities of the old system are
replicated.
F. When doing the analysis for the new system particular care
should be taken over the data specification, transformation and
manipulation, ensuring that expected outputs are defined and
that such output meets the needs and expectations of the
business users.
Answer: C,D,F

NEW QUESTION: 3
DRAG DROP
Your network contains four servers that run Windows Server 2012
R2.
Each server has the Failover Clustering feature installed. Each
server has three network
adapters installed. An iSCSI SAN is available on the network.
You create a failover cluster named Cluster1. You add the
servers to the cluster.
You plan to configure the network settings of each server node
as shown in the following
table.

You need to configure the network settings for Cluster1.
What should you do?
To answer, drag the appropriate network communication setting

to the correct cluster network or networks. Each network communication setting may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
