Explanation

NEW QUESTION: 2

Which role is typically the buyer of IBM SPSS Modeler?

- A. System Manager
- B. Business Manager
- C. Analytic Professional
- D. Business Analyst

Answer: D

NEW QUESTION: 3

While designing the business continuity plan (BCP) for an airline reservation system, the MOST appropriate method of data transfer/backup at an offsite location would be:

- A. hard-disk mirroring.
- B. hot-site provisioning.
- C. shadow file processing.
- D. electronic vaulting.

Answer: C

Explanation:

In shadow file processing, exact duplicates of the files are maintained at the same site or at a remote site. The two files are processed concurrently. This is used for critical data files, such as airline booking systems. Electronic vaulting electronically transmits data either to direct access storage, an optical disc or another storage medium; this is a method used by banks. Hard-disk mirroring provides redundancy in case the primary hard disk fails. All transactions and operations occur on two hard disks in the same server. A hot site is an alternate site ready to take over business operations within a few hours of any business interruption and is not a method for backing up data.

NEW QUESTION: 4

Note: This question is part of a series of question that use the same set of answer choices. Each answer choice may be used once, more than once, or not at all.

Your network contains a server named DC1 that has the DHCP Server server role installed.

You discover the following warning message in the Event log on DC1:

"There were orphaned entries deleted in the configuration due to the deletion of a class and option definition. Please recheck the server configuration."

You need to resolve the warning message.

What should you do?

- A. Restore the database from a backup.
- B. Configure DHCP link layer-based filtering.
- C. Reconcile the scope.
- D. Configure name protection.
- E. Configure Open Shortest Path First (OSPF) on the router

- F. Configure a DHCP Relay Agent.
- G. Configure Routing Information Protocol version 2 (RIPv2) on the router
- H. Increase the database cleanup interval.
- I. Authorize DC1 in Active Directory.
- J. Compact the database.
- K. Modify the start address.

Answer: C

Explanation:

Message: There were some orphaned entries deleted in the configuration due to the deletion of a class or an option definition. Please recheck the server configuration.

Resolve: Reconcile the DHCP scope
