NEW QUESTION: 2

A customer has three locations, and they would like to be able to send media back and forth using as little bandwidth as possible over the WAN.

Which statement describes why Cascading Media Servers will meet this requirement?

- A.** Traffic over the WAN has three times more traffic to the Cascading Media Servers.
- B.** Each endpoint sends traffic directly to the Hosting Media Server.
- C.** Individual media streams over the WAN are needed for each client.
- D.** Regional audio and video media are aggregated at the Cascading Media Servers before being sent to the other media servers.

Answer: D

Explanation:

To configure a regional cascading location, which provides media cascading to the remote locations you specify. The users at the specified locations will be able to call into the regional cascading location instead of the joining the conference directly via the hosting media server. Regional cascading locations enable you to optimize WAN bandwidth usage.
