NEW QUESTION: 1
An attacker gained physical access to an internal computer to access company proprietary data. The facility is protected by a fingerprint biometric system that records both failed and successful entry attempts. No failures were logged during the time periods of the recent breach. The account used when the attacker entered the facility shortly before each incident belongs to an employee who was out of the area. With respect to the biometric entry system, which of the following actions will help mitigate unauthorized physical access to the facility?

A. Try to set a lower False Reject Rate (FRR)
B. Try setting the Equal Error Rate (EER) to zero
C. Try raising the Crossover Error Rate (CER)
D. Try to lower the False Accept Rate (FAR)
Answer: D

NEW QUESTION: 2

A. Option A
B. Option D
C. Option B
D. Option E
E. Option C
Answer: A
Explanation:
The "System Configuration Dialog" appears only when no startup configuration file is found. The network administrator has made a mistake because the command "copy startup-config running-config" will copy the startup config (which is empty) over the running config (which is configured by the administrator). So everything configured was deleted. Note: We can tell the router to ignore the start-up configuration on the next reload by setting the register to 0x2142. This will make the "System Configuration Dialog" appear at the next reload.
