NEW QUESTION: 1

- A. Option A
- B. Option D
- C. Option B
- D. Option C

Answer: D

NEW QUESTION: 2

View the rule below. What does the lock-symbol in the left column mean? Select the BEST answer.

- A. Configuration lock is present. Click the lock symbol to gain read-write access.
- B. The current administrator has read-only permissions to Threat Prevention Policy.
- C. Another user has locked the rule for editing.

D. The current administrator is logged in as read-only because someone else is editing the policy.

Answer: C

Explanation:

Explanation

Administrator Collaboration

More than one administrator can connect to the Security Management Server at the same time. Every administrator has their own username, and works in a session that is independent of the other administrators.

When an administrator logs in to the Security Management Server through SmartConsole, a new editing session starts. The changes that the administrator makes during the session are only available to that administrator. Other administrators see a lock icon on object and rules that are being edited.

To make changes available to all administrators, and to unlock the objects and rules that are being edited, the administrator must publish the session.

NEW QUESTION: 3

Which two statements best describe the local authentication configuration options for a Cisco WLC v7.0 and local mode AP? (Choose two.)

- A.** EAP-FAST with PAC or certificate provision
