NEW QUESTION: 2
You need to recommend network fabric configurations for the
planned deployment of VMM.
What should you include in the recommendation?
A. A virtual switch extension manager
B. A port classification
C. A Hyper-V port profile for uplinks
D. A Hyper-V port profile for virtual network adapters
Answer: D
Explanation:
Explanation/Reference:
Note:
/The Hyper-V hosts in the IT private cloud will have their
network adapters configured by using logical switches.
In Virtual Machine Manager (VMM) in System Center 2012 Service
Pack 1 (SP1) or System Center 2012 R2, you can consistently
configure identical capabilities for network adapters across
multiple hosts by using port profiles and logical switches.
Port profiles and logical switches act as containers for the
properties or capabilities that you want your network adapters
to have. Instead of configuring individual properties or
capabilities for each network adapter, you can specify the
capabilities in port profiles and logical switches, which you
can then apply to the appropriate adapters.

NEW QUESTION: 3
DRAG DROP
You have an Exchange Server 2013 organization.
You need to recommend a solution to ensure that users can
access their mailbox by using IMAP4.
The solution must meet the following requirements:
The users must be able to download their email messages from
* multiple devices.
The users must be able to look up their SMTP server from
* Outlook Web App.

All IMAP4 connections must be audited.
* What should you recommend? To answer drag the appropriate recommendation to the correct requirement. Each recommendation may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Answer:
Explanation:
Box 1: Run the Set-SendConnector Settings cmdlet.
Box 2: Run the Set-MAP Settings cmdlet.
Box 3: Run the Set-ReceiveConnector Settings cmdlet.

NEW QUESTION: 4

A. Allow TCP port 25
B. Allow TCP port 23
C. Allow UDP port 25
D. Allow UDP port 110
E. Allow TCP port 110
Answer: A,E
