Allocating many RAM data buffers

In Oracle, you can start using new RAM buffers at any time. However, when you add space to a new data buffer, you must make sure that RAM is available within the Oracle SGA. Otherwise, you'll get this error: SQL> alter system set db\_16k\_cache\_size=10m; alter system set db\_16k\_cache\_size=10m ERROR at line 1: ORA-02097: parameter cannot be modified because specified value is invalid ORA-00384: Insufficient memory to grow cache To get around this problem, you can reduce the size of an existing RAM region or tell Oracle to increase the SGA size. Increasing the total size of the RAM SGA is accomplished with this simple command: alter system set sga\_max\_size=130m scope=spfile; Now that you have room to add frames to a new pool, add a new data buffer, and issue an alter system command, like so: alter system set db\_16k\_cache\_size=1028576; System Altered. You can verify that this new buffer exists by viewing the current Oracle parameters with this command: SQL> show parameters cache\_size
