NEW QUESTION: 1

It's technically possible for one business object to call another Outside of using utility objects are any of the following valid reasons why you would want to do this?

- A. Yes, but only if the object is calling itself.
- B. No, objects should never call other objects.
- C. Yes but objects calling other objects could lead to undesirable memory problems so care must be taken
- D. Yes, to create a wrapper object as a vehicle for a reusable sequence of application logic

Answer: D

NEW QUESTION: 2

DRAG DROP

You have an Exchange Server 2013 organization that contains five servers.

Several employees plan to use Microsoft Outlook to collaborate on some projects.

You need to configure access to Outlook to meet the following requirements:

Several employees must be able to send email messages as a user named User1.

Several employees must be able to send email messages on behalf of a user named User2.

Which cmdlets should you use?

To answer, drag the appropriate cmdlet to the correct requirement in the answer area. Each cmdlet may be used once, more than once, or not at all. Additionally, you may need to drag the split bar between panes or scroll to view content.

Answer:

Explanation:

NEW QUESTION: 3

Which of the following statements makes sense? Select the correct answer.

- A.** I designed my REST services to share the same XML schema.
- B.** My REST services are limited to the use of the GET HTTP method because only one XML schema was designed for all of them. In order to support additional HTTP methods, additional XML schemas will need to be designed due to the inherent dependency HTTP has on the XML Schema Definition Language.
- C.** I designed a unique XML schema for each of my REST services so that the HTTP methods used by these services are consistently named.
- D.** XML schemas cannot be used by REST services.

Answer: A
