If you buy the MS-700 learning dumps from our company, we are glad to provide you with the high quality MS-700 study question and the best service, Use Plantasparaeljardin'sManaging Microsoft Teams Microsoft free test brain dump for your complete preparation along with online MS-700 practise questions.

Please try not to hesitate; act on your initial instincts.

NEW QUESTION: 1
You have a Hyper-V host named Host1 that connects to a SAN by using a hardware Fibre Channel adapter.
Host1 contains two virtual machines named VM1 and VM2.
You need to provide VM1 with direct access to the SAN. VM2 must not require access to the SAN.
Which two configurations should you perform? (Each correct answer presents part of the solution. Choose two.)
A. On Host1, configure a new Virtual Fibre Channel SAN.
B. On VM1, configure a Fibre Channel adapter.
C. On VM1, add a network adapter.
D. On Host1, modify the Hyper-V settings.
E. On Host1, configure a new virtual switch.
Answer: A,B

Explanation:
Explanation/Reference:
Explanation:
Step 1:
D. Building a Virtual SAN
The process of setting up virtual Fibre Channel starts with
building a virtual SAN. The easiest way to accomplish this is
to open the Hyper-V Manager, right click on the listing for
your Hyper-V server in the console tree, and then choose the
Virtual SAN Manager command from the shortcut menu.
Step 2:
A. Once you have created a virtual SAN, the next step in the
process is to link a virtual machine to the virtual SAN. To do
so, right click on the virtual machine for which you want to
provide Fibre Channel connectivity and select the Settings
command from the resulting shortcut menu. Next, select the Add
Hardware container, as shown in the figure above, and then
select the Fibre Channel Adapter option from the list of
available hardware. Etc.
Note:
* Virtual Fibre Channel for Hyper-V (also referred to as
Synthetic Fibre Channel) provides VM guest operating systems
with direct access to a Fibre Channel SAN by using a standard
World Wide Name (WWN) associated with a virtual machine.

Answer: D

NEW QUESTION: 3
You have an Azure subscription named Subscription1 that is used
be several departments at your company. Subscription1 contains
the resources in the following table:

Another administrator deploys a virtual machine named VM1 and
an Azure Storage account named Storage2 by using a single Azure
Resource Manager template.
You need to view the template used for the deployment.
From which blade can you view the template that was used for
the deployment?
A. Storage1
B. RG1
C. Container1
D. VM1
Answer: B
Explanation:
1. View template from deployment history
Go to the resource group for your new resource group. Notice
that the portal shows the result of the last deployment. Select
this link.

2. You see a history of deployments for the group. In your
case, the portal probably lists only one deployment. Select
this deployment.

The portal displays a summary of the deployment. The summary
includes the status of the deployment and its operations and
the values that you provided for parameters. To see the
template that you used for the deployment, select View
template.
