And if you buy our NSE6_FWB-6.1 study guide, you will love it, Many people who have passed some IT related certification exams used our Plantasparaeljardin's training tool.

If you are looking for a discounted offer, then you are in good hands.

NEW QUESTION: 1
A system administrator needs to update their Cascade Profiler host group settings to remove references to a decommissioned office on the 10.63.32.0/24 subnet.

What is the best way to do this?
A. Go to Host Groups and insert " #10.63.32.0/24 Bracknell_UK"
B. Edit the Definition and remove the entry for 10.63.32.0/24

Bracknell_UK
C. echo "delete from hostinfo where ipaddr = '10.63.32.0/24';"
| psql mazu postgres
D. echo "delete from hostinfo where group = 'Bracknell_UK;'" |
psql mazu postgres write_community_string
Answer: B

NEW QUESTION: 2
Your company has a main office and four branch offices. The
main office is located in London.
The network contains an Active Directory domain named
contoso.com. Each office contains one domain controller that
runs Windows Server 2012. The Active Directory site topology is
configured as shown in the exhibit. (Click the Exhibit button.)
You discover that when a domain controller in a branch office
is offline for maintenance, users in that branch office are
authenticated by using the domain controllers in any of the
sites.
You need to recommend changes to Active Directory to ensure
that when a domain controller in a branch office is offline,
the users in that branch office are authenticated by the domain
controllers in London.
What should you include in the recommendation?
Exhibit

A. Modify the DC Locator DNS Records settings.
B. Modify the service location (SRV) records in DNS.
C. Disable site link bridging.
D. Modify the site link costs.
Answer: A
Explanation:
If local DC (domain controller) is not available, DC Locator
service will look for another DC in a different site.

NEW QUESTION: 3
You have a report that contains a bar chart and a column chart.
The bar chart shows customer count by customer segment. The
column chart shows sales by month.
You need to ensure that when a segment is selected in the bar
chart, you see which portion of the total sales for the month
belongs to the customer segment.
How should the visual interactions be set on the column chart
when the bar chart is selected?
A. highlight
B. no impact
C. filter
Answer: A
Explanation:
HIGHLIGHT as the question required us to "you see which portion

of the total sales for the month belongs to the customer segment" -- in order to see WHICH portion, you need to still see the whole visual, highlight is most appropriate. If the requirement stated to ONLY SEE THE PORTION IT RELATES TO then filter would be appropriate.

NEW QUESTION: 4
You are creating a non-global zone on your system.
Which option assigns a zpool to a non-global zone, and gives the zone administrator permission to create zfs file system in that zpool?
A. While creating the non-global zone, make the following entry: add deviceset match=/dev/rdsk/ c4t0d0endBoot the zone and log in the zone as root. Create the zpool: zpool create pool2 c4t0d0In the non-global zone, root can now create ZFS file system in the pool2 zpool
B. Create the zpool in the global zone: global#zpool create pool2 c4t1d0Boot the non-global zone, log in to the zone as root, and issue this command to delegate ZFS permissions to root: non-global zone# zfs allow root create , destroy, mount pool2Log in to the non-global zone create ZFS file systems in the pool2 zpool.
C. In the global zone, create the zpool and the ZFS file systems that you want to use in the non-global zone: global#zpool create pool2 c4t1d0global#zfs create pool2/dataWhile creating the non-global zone, make the following entry for each ZFS file system that you want to make available in the zone: add fsset dir=/dataset special=pool2/dataset type=zfsend
D. In the global zone, create the zpool: global# zpool create pool2 c4t1d0While creating the no-global zone, make the following entry: add datasetset name=pool2endadd fsset dir=pool1set special=pool1set type=zfspool1endBoot the zone, log in the zone as root, and create the zfs file system in the pool2 zpool.
E. In the global zone, create the zpool:global#zpool create pool2 c4t1d0While creating the global zone, make the following entry: add datasetset name=pool2endBoot the zone, log in to the zone as root and create the zfs file systems in the pool2 zpool.
Answer: C
Explanation:
Explanation/Reference:
Explanation:
You can add a ZFS file system to a non-global zone by using the zonecfg command's add fs subcommand.
In the following example, a ZFS file system is added to a non-global zone by a global zone administrator from the global zone:
zonecfg -z zion
zonecfg:zion> add fs

```
zonecfg:zion:fs&gt; set type=zfs
zonecfg:zion:fs&gt; set special=tank/zone/zion
zonecfg:zion:fs&gt; set dir=/export/shared
zonecfg:zion:fs&gt; end
```
