NEW QUESTION: 3

Which of the following service capabilities gives the cloud customer an established and maintained framework to deploy code and applications?

- A. Infrastructure
- B. Platform
- C. Desktop
- D. Software

Answer: B

Explanation:

The platform service capability provides programming languages and libraries from the cloud provider, where the customer can deploy their own code and applications into a managed and controlled framework.

NEW QUESTION: 4

HOTSPOT

You have a server named Server1 that runs Windows Server 2012 R2.

You configure Network Access Protection (NAP) on Server1.

Your company implements a new security policy stating that all client computers must have the latest updates installed. The company informs all employees that they have two weeks to update their computer accordingly.

You need to ensure that if the client computers have automatic updating disabled, they are provided with full access to the network until a specific date and time.

Which two nodes should you configure?

To answer, select the appropriate two nodes in the answer area.

Answer:

Explanation:
