the practice exam is literally very goodd no doubt, there is no doubt the BCS PC-SD-DSD-20 dumps are created by experts in the best way, We assist about 56297 candidates to pass exams every year.

NEW QUESTION: 1

What is the effect of the following sysFilter when added to a Recipient schema extension?

- A. Recipients without email addresses will automatically be executed from email deliveries
- B. All Web Applications that capture an email address will automatically validate that the field is not empty
- C. When viewing or loading Recipients in Adobe Campaign, only Recipients with an email address are displayed or loaded
- D. Only Recipients with email address can be inserted into the database

Answer: C

NEW QUESTION: 2

You need to create a high performance shared file system, and have been advised to use file storage service (FSS). You have logged into the Oracle Cloud Infrastructure console, created a file system, and followed the steps to mount the shared file

system on your Linux instance. However, you are still unable to access the shared file system from your Linux instance.

What is the likely reason for this?

- A. There are no security list rules for mount target traffic
- B. There is no internet gateway (IGW) set up for mount target traffic
- C. There is no route in your virtual cloud network's (VCN) route table for mount target traffic
- D. There is no Identity and Access Management (IAM) policies set up to allow you to access the mount target

Answer: D

NEW QUESTION: 3

A Linux instance is unable to access a shared file system from another Linux instance. What is the likely reason for this?

- A. There are no security list rules for mount target traffic
- B. There is no internet gateway (IGW) set up for mount target traffic
- C. There is no route in your virtual cloud network's (VCN) route table for mount target traffic
- D. There is no Identity and Access Management (IAM) policies set up to allow you to access the mount target

Answer: D

Explanation:

The correct answer is D. IAM policies must be configured to allow the Linux instance to access the shared file system. Security list rules, internet gateways, and routes are not the primary reason for this issue in this context.
