Credited towards Pegasystems Certified Pega Decisioning Consultant, You [Valid Dumps NCP-DS Questions](#) can first online free download Plantasparaeljardin's trial version of exercises and answers about Pegasystems certification PEGAPCDC85V1 exam as a try, then you will be more confident to choose Plantasparaeljardin's product to prepare for Pegasystems certification PEGAPCDC85V1 exam.

100% Pass Quiz Pegasystems - PEGAPCDC85V1 - Pega Certified Decisioning Consultant (PCDC) 85V1 Useful New Study Notes The specialists as backup play a crucial role [C TS412 1909 Latest Version](#) in your exam, and we have realized the importance of it, Pegasystems PEGAPCDC85V1 web-based test engine is our newly developed **New PEGAPCDC85V1 Study Notes** online testing engine that provides you with a real Pega Certified Decisioning Consultant (PCDC) 85V1 Exam scenario.

Valid PEGAPCDC85V1 Practice Questions, We can confirm that the high quality is the guarantee to your success, You can download the trial of PEGAPCDC85V1 dumps free before you buy and you will enjoy the right of free update the PEGAPCDC85V1 dumps pdf one-year after you purchase.

The demos of trial are chosen from the PEGAPCDC85V1 valid braindumps which contains accurate PEGAPCDC85V1 test answers and some detailed explanations.

**NEW QUESTION: 1**

Examine the commands and output shown:

What is the cause of this connection refusal? (Choose the best answer.)

- A. The web server is not listening on the local loopback adapter
- B. The system has no route to localhost
- C. The firewall blocked the connection due to an unintended rule blocking localhost port 80
- D. The web server has no documents to serve

**Answer: C**

**NEW QUESTION: 2**

Refer to the exhibit.

A network administrator views the configuration files on an ArubaOS switch and sees the output in the exhibit. The administrator enters this command:

```
Switch# boot system flash primary config config2
```

After the switch boots, the administrator makes some configuration changes and saves the configuration with the write memory command. The administrator then enters this command:

```
Switch# boot
```

After the switch boots, the configuration changes just made are not present.

How can the administrator restore the configuration with the changes?

- A. Use the boot set-default command to configure the switch to use the secondary software. Then reboot the switch.
- B. Use the startup-default command to configure the switch to use the config2 file with the primary software. Then reboot the switch.
- C. Reboot the switch and interrupt the boot process. Find the temporary file with the configuration changes and apply that file to the startup-config.
- D. Rename the config2 file to config1. Then reboot the switch.

**Answer: B**

### NEW QUESTION: 3

Refer to the exhibit. A network administrator enters the following command on a switch:

```
Switch# boot system flash primary config1
```

The administrator then enters the following command:

```
Switch# write memory
```

After the switch boots, the configuration changes just made are not present. How can the administrator restore the configuration with the changes?

- A. Use the boot set-default command to configure the switch to use the secondary software. Then reboot the switch.
- B. Use the startup-default command to configure the switch to use the config1 file with the primary software. Then reboot the switch.
- C. Reboot the switch and interrupt the boot process. Find the temporary file with the configuration changes and apply that file to the startup-config.
- D. Rename the config1 file to config2. Then reboot the switch.

**Answer: C**

### NEW QUESTION: 4

Refer to the exhibit. A network administrator enters the following command on a switch:

```
Switch# boot system flash primary config1
```

The administrator then enters the following command:

```
Switch# write memory
```

After the switch boots, the configuration changes just made are not present. How can the administrator restore the configuration with the changes?

**Answer: A**

Explanation:

A managed identity from Azure Active Directory allows your app to easily access other AAD-protected resources such as Azure Key Vault. The identity is managed by the Azure platform and does not require you to provision or rotate any secrets. User assigned managed identities can be used on Virtual Machines and Virtual Machine Scale Sets.
