Containers
Containers are used to run applications in a consistent environment across different operating systems and hardware architectures. They provide a lightweight and portable way to package and run applications. Containers are managed by a container engine, which allows you to create, start, stop, and manage containers. Containers are often used for microservices, DevOps, and cloud-native applications.

- C. Incident management
- D. Job rotation

Answer: D

NEW QUESTION: 3

- A. Option C
- B. Option A
- C. Option B
- D. Option D

Answer: C

Explanation:
Cisco default encapsulation is HDLC which is by default enabled on all cisco router. If we want to enable other encapsulation protocol(PPP,X.25 etc) we need to define in interface setting. But here except s1/1 all interface defined by other encapsulation protocol so we will assume default encapsulation running on s1/1 interface and s1/1 interface connected with North
