Which of the following best describes what would be expected at a "hot site"?

- A. Computers, climate control, cables and peripherals
- B. Dedicated climate control systems
- C. Computers and peripherals
- D. Computers and dedicated climate control systems.

Answer: A

Explanation:

A Hot Site contains everything needed to become operational in the shortest amount of time.

The following answers are incorrect:

Computers and peripherals. Is incorrect because no mention is made of cables. You would not be fully operational without those.

Wikipedia: "A hot site is a duplicate of the original site of the organization, with full computer systems as well as near-complete backups of user data."
