We do not want to do a hammer trading like some website with low price.

#### **NEW QUESTION: 1**

The share phase of the cloud data lifecycle involves allowing

data to leave the application, to be shared with external systems, services, or even other vendors/contractors. What technology would be useful for protecting data at this point?

- A. DLP
- B. WAF
- C. IDS
- D. IPS

**Answer: A**

Explanation:

Data loss prevention (DLP) solutions allow for control of data outside of the application or original system. They can enforce granular control such as printing, copying, and being read by others, as well as forcing expiration of access. Intrusion detection system (IDS) and intrusion prevention system (IPS) solutions are used for detecting and blocking suspicious and malicious traffic, respectively, whereas a web application firewall (WAF) is used for enforcing security or other controls on web-based applications.
