NEW QUESTION: 1

Which design phase service component activity is part of the staging plan development?

- A. Checking Hardware and Software Configuration
- B. Present Systems Acceptance Test Plan
- C. Planning an Escalation Notification Process
- D. Detailing Installation and Service Requirements in a Controlled Implementation Environment

Answer: D

NEW QUESTION: 2

- A. Option A
- B. Option B
- C. Option C
- D. Option D

Answer: A

NEW QUESTION: 3

CORRECT TEXT

Scenario: A Citrix Administrator must use the Provisioning Services Console to add three additional server OS machines to CCH's environment. The administrator must add the machines to an existing machine catalog named Server 2012 and the machines should be assigned the ServerOS2012 vDisk. The administrator must name the machines AppServer04, AppServer05 and AppServer06, respectively, and the machines should be added to the Server OS Machines OU, with plans to add 20 more server OS machines in the future. Provisioning Services is configured to use Network0 as a streaming network interface card. There is currently one Delivery Controller in the environment named Controller-1. This Delivery Controller is a member of the CCH.com domain. The username for the hypervisor is root, and the password is Password 1.

Tasks:

1. Create three target devices named AppServer04, AppServer05 and AppServer06, respectively.
2. Ensure the target devices are configured according to the requirements outlined in the scenario.

Answer:

Explanation:

Review the steps and solution in explanation below.

Explanation:

- 1) Right click on "CCHSite" and click on XenDesktop Setup Wizard.
- 2) From the "Welcome to XenDesktop" dialog window click on Next.
- 3) From the "XenDesktop Controller" dialog window type in Controller-1 in the "XenDesktop Controller address:" field then click on Next.
- 4) From the "XenDesktop Host Resources" dialog windows click on Next.
- 5) From the "XenDesktop Host Resources Credentials" popup window type in the password of Password1 for the username "Root" then click on OK.
- 6) From the "Template" dialog window select the Server 2012 template then click on Next.
- 7) From the "vDisk" dialog window select ServerOS2012 vdisk then click on Next.
- 8) From the "Catalog" dialog window select Create a new catalog, type in a "Catalog name:" of Server 2012 then click on Next.
- 9) From the "Operating System" select Windows Server Operating System then click on Next.
- 10) From the "Virtual machines" dialog windows increase the number of "Virtual machines to create:" 3 then click on Next.
- 11) From the "Active Directory" dialog window verify "Create new accounts" is selected then click on Next.
- 12) From the "Active Directory accounts and location" dialog window Server OS Machines OU, in the "Account naming scheme" field type in AppServer##, select 0-9 from the drop down to the right, then click on Next.
- 13) From the "Summary" dialog window click on Finish.
- 14) When the devices are finished creating click on Done.
