**NEW QUESTION: 1**

1. Which of the following is a valid IP address? (Choose two.)  
A. 192.168.0.1  
B. 192.168.0.1.1  
C. 192.168.0.1.1.1  
D. 192.168.0.1.1.1.1

A. 192.168.0.1

B. 192.168.0.1.1

## Explanation:

Updates in WSUS are approved against "Computer Group" , not AD OUs. For this example, to prevent Server1 to install automatically approved updates, you have to remove Server1 from "Test" computer group and add Server1 into "Production" computer group in WSUS console, manually or use the WSUS GPO Client-Side Targeting feature. <https://technet.microsoft.com/en-us/library/cc720450%28v=ws.10%29.aspx?f=255&MSPPError=-2147217396> With client-side targeting, you enable client-computers to add themselves to the computer groups you create in the WSUS console. You can enable client-side targeting through Group Policy (in an Active Directory network environment) or by editing registry entries (in a non-Active Directory network environment) for the client computers. When the WSUS client computers connect to the WSUS server, they will add themselves into the correct computer group. Client-side targeting is an excellent option if you have many client computers and want to automate the process of assigning them to computer groups. First, configure WSUS to allow Client Site Targeting.

Secondly, configure GPO to affect "ProdOU" , so that Server1 add itself to "Production" computer group. <https://prajwaldesai.com/how-to-configure-client-side-targeting-in-wsus>

## NEW QUESTION: 4

Pardot is a cloud-based marketing automation platform. A Pardot user wants to create a list of leads that are interested in a new product. The user wants to use a Pardot list to track leads that have visited the product page on the company website. Which two actions should the user take to create this list? (Choose two.)
