Answer: B

NEW QUESTION: 2

Which of the following is the correct configuration for the console line password?

- A. adminadmin123
- B. cisco123
- C. default
- D. testing 1234

Answer: D

Explanation:

If neither the enable password command nor the enable secret command is configured, and if there is a line password configured for the console, the console line password serves as the enable password for all VTY sessions. The "enable secret" will be used first if available, then "enable password" and line password.
