NEW QUESTION: 2

A new MPLS network link has been established between a company and its business partner.

The link provides logical isolation in order to prevent access from other business partners. Which of the following should be applied in order to achieve confidentiality and integrity of all data across the link?

- A. HTTPS and SSH for all application flows.
- B. MPLS should be run in IPVPN mode.
- C. SSL/TLS for all application flows.
- D. IPSec VPN tunnels on top of the MPLS link.

Answer: D

Explanation:

Section: Cryptography

Explanation/Reference:

Explanation:

IPSec can very well be used with MPLS. IPSec could provide VPN tunnels on top of the MPLS link.

Internet Protocol Security (IPSec) isn't a tunneling protocol, but it's used in conjunction with tunneling protocols. IPSec is oriented primarily toward LAN-to-LAN connections, but it can also be used with dial-up connections. IPSec provides secure authentication and encryption of data and headers; this makes it a good choice for security.

NEW QUESTION: 3

Why is desirability the starting point when it comes to a successful idea?

Note: There are 1 correct answers to this question.

A. Because its not about building a new product and service and then searching for customers. It's about going to the customers first, determining their needs, and then creating something to meet their needs.

B. As a design thinker, the problems you are trying to solve are rarely your own-they are those of a particular group of people; in order to design for them, you must gain empathy for who they are and what is important to them.

Answer: A
